DONALDSON SEWER SYSTEM
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2024

Note 1. Significant Accounting Policies:

The Donaldson Sewer System, the "System", is an Enterprise Fund of the Town of Donaldson, Arkansas and is governed by the City Council of the Town of Donaldson, Arkansas. The accompanying financial statements and other information reflect the Donaldson Sewer System fund only and do not include other funds of the Town of Donaldson, Arkansas.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

The accompanying financial statements were prepared using the accrual basis of accounting in accordance with generally accepted accounting principles under which revenues are recognized when earned, and expenses are recorded when incurred. The System applies all relevant Government Accounting Standards Board (GASB) pronouncements. The System applies Financial Accounting Standards Board (FASB) pronouncements and Accounting Principles Board (APB) opinions issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements in which case, GASB prevails.

For purposes of the Statement of Cash Flows, the System considers all highly liquid investments (including restricted assets) with a maturity of three months or less when purchased to be cash equivalents.

Bad debts, which are immaterial in amount after applying customers' meter deposits, are recognized based on the allowance method.

Capital Assets are stated at cost or customer cost of construction on contributed assets. Depreciation is calculated using the straight-line method over the estimated useful lives as follows:

Office Equipment	5 - 7 Years
Sewer Expansion	50 Years
Sewer System and Equipment	7 - 50 Years
Pump Relocation	50 Years

Management has evaluated subsequent events through October 23, 2025, the date the financial statements were available for issuance.

Note 3. Public Fund Deposits and Investments:

State law generally requires that City funds be deposited in federally insured banks located within the State of Arkansas. The deposits may be in the form of checking accounts, savings accounts, and/or time deposits.

Public funds may also be invested in direct obligations of the United States of America and obligations where principal and interest are fully guaranteed by the United States of America. All cash funds of the System, except bonds funds held by the trustees of prior bond issues, are deposited in accounts in the name of Donaldson Sewer system in financial institutions permitted by law.

Custodial Credit Risk: Custodial credit risk is the risk that in the event of a bank failure, a government's deposits may not be returned to it. Donaldson Sewer System does not have a policy for custodial credit risk. The carrying value of the System's accounts and investments at December 31, 2024 was \$89,953. On that date, deposits in financial institutions, reported as components of cash, cash equivalents, and investments, had bank balances of \$90,452 before adjustment for outstanding items.

Federal Deposit Insurance Corporation coverage allows for \$250,000 of coverage on all accounts deposited within each financial institution participating in the FDIC program. We were unable to determine the amount of FDIC coverage for Donaldson Sewer accounts and investments. FDIC coverage is provided on an entity level to be shared jointly by all Town of Donaldson accounts and investments at a financial institution.

Investment Interest Rate Risk: The System does not have an investment interest rate risk. All investments are short-term certificates of deposit and the System is under no obligation to renew upon maturity.

Investment Credit Risk: The System does not have a formal investment policy. All investments are short-term certificates of deposit with banks authorized by state law to receive deposits of public funds and with which the System has a collateral agreement.

Foreign Currency Risk: The System has no exposure to foreign currency risk.

The System maintains commercial insurance coverage covering each of those risks of loss. Management believes such coverage is sufficient to preclude any significant uninsured losses to the System.
